

Preface

We are pleased to present the volume of 2018 3rd International Conference on Sustainable and Renewable Energy Engineering. The conference ICSREE2018 was held in the University of Salamanca, Zamora, Spain during May 9-11, 2018; with the aim to create a linkage between industry and academia; the conference is dedicated to building an overarching technology platform for researchers in academics. As part of the event, the ICSREE issue meant to look far out enough in time, space and across disciplines and focusing on energy materials science, environmental engineering, clean energy and new energy technology, solar energy utilization technology.

The conference program was put together as a result of much hard work and dedication by many individuals. With the important efforts of the whole committee, the evaluation of all the papers was performed based on the reports from anonymous reviewers, who are qualified in the field of sustainable and renewable energy. We envision that the volume will provide an opportunity for readers to engage with a selection of refereed papers that were presented during the ICSREE2018 conference.

This conference has also been highlighted by the guest speakers: Prof. David T.W. Lin, from National University of Tainan, talked on *A Similar Capacity Test Model of Geothermal Energy*; Prof. Jesus Toribio, from University of Salamanca, Spain, talked on *Cold Drawn Pearlitic Steel Wires for Wind Turbines Structures: In the Wake of Miguel de Cervantes and Johann Sebastian Bach*; Prof. Nezihe Ayas, from Eskisehir Technical University, Turkey, talked on *Hydrogen Production From Biomass Gassification*.

Special thanks would be extended to the University of Salamanca, Spain for the support of the conference, including providing conference venue, arranging illuminating visits in the labs and campus.

Our sincere gratitude goes to the session chairs and the technical program committee members for their hard efforts in ensuring the paper quality.

We hope that you enjoy and find valuable your engagement with the ideas in sustaining your own professional development in the global world of engineering energies.

The 2019 4th International Conference on Sustainable and Renewable Energy Engineering will be held in Beijing, China. We hope that ICSREE will provide the incentive to experiment and sufficient motivation to continue making progress.

Conference Program Chair

Prof. Dr. Nezihe Ayas,

Eskisehir Technical University, Turkey
