

Preface

2018 The International Conference on Renewable Energy and Environment Engineering (REEE 2018) was successfully held in Paris, France on October 29th to 31st.

The proceedings are the result of REEE 2018, which presents 24 accepted articles selected from more than 60 papers submitted to the conference from 20 countries and districts including Portugal, Canada, South Africa, Poland, Japan, Philippines, Estonia, China, Morocco, Romania, Algeria, Ecuador, Russia, Spain, Rwanda, Malaysia, etc. All of the papers were subjected to peer-review by the program technical committee members and international reviewers. All the papers are presented orally in two parallel sessions.

We had three very interesting keynote speakers Prof. Nidia Caetano, School of Engineering (ISEP), Polytechnic Institute of Porto (IPP), Portugal; Prof. Carlos Felgueiras CIETI/ISEP, Portugal and Prof. Saad Mekhilef, University of Malaya, Malaysia.

On behalf of the organizing committee, I would like to express my sincere gratitude to guest editors, program technical committee members and international reviewers, who provided constructive criticism and stimulated comments and suggestions to the authors. It's a tough work to select papers from the submissions, and without their hard work the proceedings will not see the light. Besides, we also want to thank the chairs, who are dedicated to make sure to run the conference smoothly, the keynote speakers and invited speakers who shared with us their precious research findings.

Finally, I hope the readers will find the proceedings interesting and valuable. Hope to see you in the REEE conference in the near future.

Yours Sincerely,

Prof. Saad Mekhilef
Program Chair
University of Malaya, Malaysia
