

Preface

We are pleased to present the volume of 2018 6th International Conference on Environment Pollution and Prevention (ICEPP 2018). The conference ICEPP 2018 was held in the The University of Queensland, Australia during December 6-8, 2018. The conference is dedicated to building an overarching technology platform for researchers in academics focusing on Environment Pollution and Prevention.

The conference program was put together as a result of much hard work and dedication by many individuals. With the important efforts of the whole committee, the evaluation of all the papers was performed based on the reports from anonymous reviewers, who are qualified in the field of Environment Pollution and Prevention. We envision that the volume will provide an opportunity for readers to engage with a selection of refereed papers that were presented during the ICEPP 2018 conference.

This conference has also been highlighted by the guest speakers: Prof. Rodney Stewart, from Griffith University, Queensland, Australia, talked on *Role of Intelligent Sensor Networks and Big Data Informatics for Managing Urban Water and Energy Resources*; Prof. James T. Anderson, from West Virginia University, USA, talked on *Can we Build Functional Wetlands?* ; Prof. R. J. (Dick) Haynes, from The University of Queensland, St Lucia, Queensland, Australia, talked on *Sustainable revegetation of metal processing tailings - bauxite residue as an example*.

Our sincere gratitude goes to the session chairs and the technical program committee members for their hard efforts in ensuring the paper quality.

We hope that you enjoy and find valuable your engagement with the ideas in sustaining your own professional development in the global world of engineering energies.

Conference Chair

Prof. R. J. (Dick) Haynes
