

International Conference on Innovations, Physical Studies and Digitalization in Mining Engineering 2021

International Conference on Innovations and Prospects of Development of Mining Machinery and Electrical Engineering 2021 was held at Saint-Petersburg Mining University, Saint-Petersburg, Russia on April 22-23, 2021. This conference is a scientific forum for researchers and students to exchange ideas in the field of mining engineering, mineralogy, geochemistry and petrography as for industry professionals to discuss technical issues and its implementation.

More than 250 representatives of leading educational and industrial organizations take part in the conference every year. Due to the current topic and high level of scientific reports, the conference has established itself as an authoritative and popular discussion platform for presentations of the scientific vision of the development of the mineral and fuel and energy complexes of Russia.
