

Preface

The organizing committee of ESMA 2021 is proud to present the proceedings of the 2021 7th International Conference on Environmental Science and Material Application (ESMA 2021: <http://www.icesma.org/>), held in Xi'an, China from 19 to 20 December, 2021. We warmly welcome prospective authors submit new research papers to ESMA 2021, and share the valuable experiences with the scientist and scholars around the world.

The conference is an international forum for the presentation of technological advances and research results in the fields of natural resources, environmental science, environmentally friendly materials, green energy and power engineering. The conference will bring together leading researchers, engineers and scientists in the domain of interest from around the world.

ESMA 2021 received more than 126 manuscripts, and 52 submissions have been accepted by our reviewers. By submitting a paper to ESMA 2021, the authors agreed to the review process and understood that papers would undergo a peer-review process. Manuscripts were reviewed by appropriately qualified experts in the field selected by the conference committee, who took detailed comments and the authors would submit a revised version that took into account this feedback. All papers were reviewed using a double-blind review process: authors declared their names and affiliations in the manuscript for the reviewers to see, but reviewers did not know each other's identities, nor did the authors receive information about who had reviewed their manuscript.

The committees of ESMA 2021 invested great efforts in reviewing the papers submitted to the conference and organizing the sessions to enable the participants to gain maximum benefit. We do believe your great participation will make our conference success and we would appreciate your participation.

With our warmest regards,

Conference Organizing Chair

Xi'an, China
