

## PREFACE

The 3rd International Conference on Agribusiness and Rural Development (IConARD) 2022 was held virtually on 20-21 July 2022. This conference focused on "Agriculture and Rural Development for Human Welfare."

Human welfare is an issue still faced by many regions and even countries. Before Covid-19, this issue existed, but a massive outbreak epidemic increased welfare inequality. This conference covered the scope of agribusiness, agricultural economics, rural environment development, and agricultural technology and smart farming, which was hoped to contribute to human welfare.

This conference has participated by many researchers from Hong Kong, Russia, Kazakhstan, Australia, South Korea, Vietnam, Nigeria, Malaysia, Japan, Uzbekistan, and Indonesia. The diversity could bring various opinions about human welfare from some regions. To ensure the published papers have high quality, the editorial board and reviewers of IConARD 2022 were experts in their related areas. The publications hope significantly contribute to the development of human welfare.

We would like to deliver big gratitude to all participants, keynote speakers, committees, and other parties that helped this conference.

Committee of IConARD 2022
