The 2022 International Symposium of the Society of Core Analysts (SCA), founded in 1986, is a chapter - at -large of the Society of Petrophysicists and Well Log Analysts (SPWLA) . In 2022, the symposium was held in Austin, TX, between September 19 and 23, featuring a workshop on “Core Analysis in Carbon Geosequestration, Geothermal, and Nuclear-Waste disposal” and various technical sessions showcasing 33 oral presentations, 14 posters with manuscripts and 17 posters. The symposium theme was “Augment Core Analysis to Embrace Energy Transition”

The collection of articles published in the SHS Web of conferences consists of fifteen (15) articles prepared for oral presentations. Thirty-one (31) proceedings presented in this symposium, published in other journals, and seventeen (17) posters are not included in this collection.
